

Meets Thermal Shock Requirements of MIL-STD-202-107 Condition F3 T50R0-200-1E

### T50R0-200-1E Features:

- TCE Matched, All Brazed Construction
- RoHS Compliant
- Customer Defined Testing Available
- · Enhanced Mechanical Strength
- Covered Resistor Element
- ±5% Resistor Tolerance

#### T50R0-200-1E Parameters:

Operating Frequency: DC - 2GHz
Rated Power: 200W\*

Return Loss (Typical)\*\*: 20dB or Bet

Return Loss (Typical)\*\*: 20dB or Better Impedance:  $50\Omega \pm 5\%$ \*\*\*

Resistor Construction: Thick Film on BeO Attached with AuGe Braze

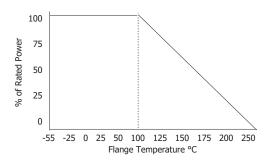

Flange Construction: Copper Tungsten

Lead Construction: Copper Attached with AuGe Braze

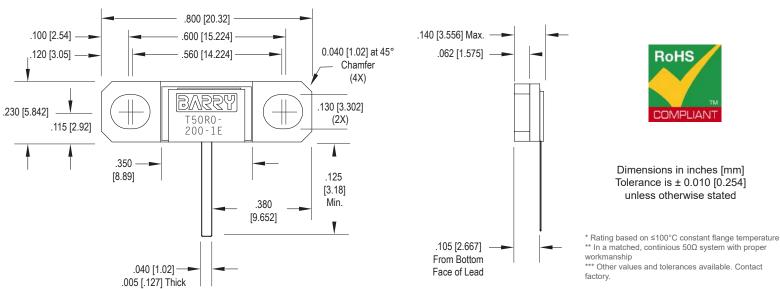

Operating Temperature: -55 to +250°C

# CHICAGO PROPERTY OF THE PARTY O

## T50R0-200-1E Power Derating Curve

#### T50R0-200-1E Dimensions:

200W BeO Flanged Termination

Meets Thermal Shock Requirements of MIL-STD-202-107 Condition F3 T50R0-200-1E

# T50R0-200-1E Reliability Data:

Parameter:	Test Condition:	Results:
Short Time Overload	Apply 1.1x Rated Power for 5 Seconds.	≤ 2.0% Resistance Shift
Rated Load Life	Apply Full Power at 100°C ±2°C 90 Minutes on/ 30 Minutes off. Repeat for 1000 hours	≤ 2.0% Resistance Shift
Moisture Resistance	MIL-PRF-55342 para.4.8.9 95% RH, 25°C - 65°C	≤ 2.0% Resistance Shift
Resistance to Soldering Heat (Lead)	MIL-STD-202 Method 210 Test Condition "A"	≤ 2.0% Resistance Shift
Resistance to Soldering Heat (Assembly)	MIL-STD-202 Method 210 Test Condition "J"	≤ 2.0% Resistance Shift
Terminal Strength	MIL-STD-202 Method 211 Test Condition "A" 3lbs. Test Condition "B" 5 bends	No Significant Abnormality (Visual)
Solderability (Lead only)	MIL-STD-202 Method 208 Test C	>95% Covered
High Temperature Storage	125°C ±2°C for 500 Hours	<ul><li>1.) ≤ 2.0% Resistance Shift</li><li>2.) No Significant Abnormality (Visual)</li></ul>
Thermal Shock	-65°C to +150°C Each Cycle 30 Minutes for 500 Hours	<ul><li>1.) ≤ 2.0% Resistance Shift</li><li>2.) No Significant Abnormality (Visual)</li></ul>

For further detail on the advantages of using TCE Matched Copper-Tungsten flange mount devices from Barry Industries please refer to the Application Note 'Finite Element Analysis of a High Power Resistor'. This document can be found on the Barry Industries website: www.barryind.com.
