R1000-800-1E

BeO

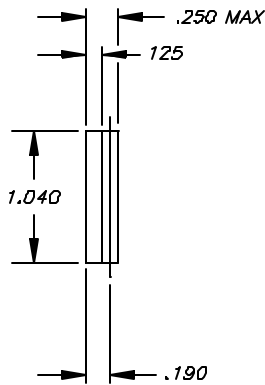

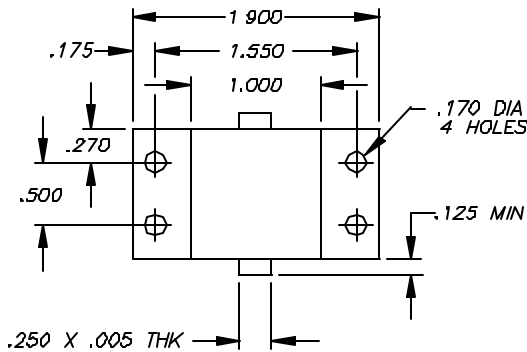

RESISTOR

Features:

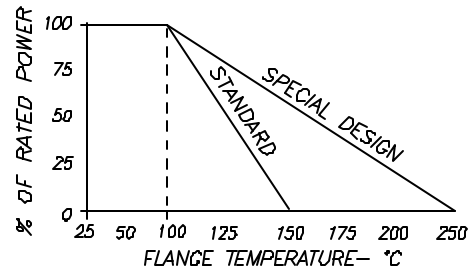

- ◆ BeO material
- ◆ Brazed construction
- ◆ 800 Watt power handling

General Description:

The R1000-800-1E is a 100 Ohm BeO flange mounted resistor capable of dissipating 800 Watts while maintaining a constant flange temperature of 100°C max. Its all brazed construction ensures that the assembly stays intact during interface.

DERATING CURVE:

Parameter	Min.	Typ.	Max.	Units
Power Dissipation			800	Watts
Flange Temperature			100	°C
